# *Caregiver Wives*

A support group for women caring for a spouse or significant other with a chronic or progressive illness.

There are many support groups for caregivers, but spouses who are caregivers face very different issues from those who are adult children. This group is a special one just for caregiver wives because of the special issues they share in the meetings.

Join us to talk about frustrations, fun incidents, topics, interests, news, etc. Come for a break, to meet others in the same situation, or just to laugh and share.
